Profile

Full stack developer with three years of experience, focused on creating accessible and responsive systems. I have experience with Javascript-derived technologies, especially TypeScript, React, Next, and also with PHP focused on Apache hosting. I have also used Java, C++, Nest, Node, and also had contact with the creation of Docker images.

Experience

IT USER SUPPORT TECHNICIAN | EXATO CONSULTORIA | AUGUST 2021 – CURRENTLY

Development and maintenance of systems and websites for public and private entities

- Electronic process processing system;
- Electronic voting system for municipal councils;
- Request system for communication between the public and the municipality;

General technical support

- Coordinate customer support, resolving everyday queries about the use of the platforms;
- Check the need for corrections in the systems, minimizing the occurrence of instability, ensuring efficient transmission and continuous operation of the systems;
- Hardware and Software Maintenance.

Monitor the functioning of the systems

• Test and monitor all implemented functionalities, ensuring that the systems are operational and fault-free.

Tools used on a daily basis:

Front: Javascript, React and PHP;

Back: Node and Java;

Database: MySQL and PostgreSQL;
